AnglerPass

anglerpass.com

The operating system for private water access in fly fishing

AnglerPass is building the software and transaction layer for private fly-fishing access. The platform connects clubs, landowners, anglers, and guides in one unified system for membership operations, property access, reservations, payments, and cross-club reciprocity. Private clubs act as the trust layer that unlocks the entire ecosystem.

Market Opportunity
- 57.9M U.S. fishing participants
- 8.0M+ fly anglers
- 78M annual fly-fishing outings
- 48% of fly anglers earn $75K+ household income

Fly fishing is a large, affluent, repeat-participation market with strong demand for premium access and limited high-quality supply with archaic access structure.

Problem

Private water access is fragmented and inefficient.
- Clubs rely on spreadsheets, calls, and manual approvals
- Landowners lack structured systems to control access
- Anglers struggle to find legitimate private water
- Guides lack consistent access to premium locations

The market exists. The infrastructure does not.

Solution

AnglerPass provides a unified operating system for:
- Club membership and operations
- Property onboarding and access control
- Booking and reservation management
- Payments and payouts
- Cross-club access across a trusted network

This transforms isolated operations into a scalable, connected ecosystem.

Business Model

Three revenue layers:

SaaS
- $79–$499/month club subscriptions (Early access pricing, goes up 01OCT2026)

Transactions
- 15% platform fee on rod fees
- $20/rod/day retained on cross-club bookings
- 10% guide service fee

Infrastructure
- 5% platform fee on member initiation and dues

Early Validation
- 1 club actively in onboarding - Rocky Mountain Angling Club (RMAC) one of the most prominent private fly fishing clubs in the country
- ~45 properties represented across multiple states
- Multi-state inventory at launch
- Pre-revenue, pre-public — launch in 4 weeks

Built in direct consultation with RMAC leadership. The product reflects 25 years of firsthand insight into how elite private clubs actually operate.

Unit Economics

Medium Club (RMAC-scale)
- 1,200 members / $3,000 annual dues
- 1.5 rod-days per member / $75 avg rod fee

Revenue per club:
- Subscription: $5,988
- Dues fee (5%): $180,000
- Rod fee revenue (15%): $20,250
- Cross-club fees ($25/rod-day): $22,500
- Guide fees (10%): $13,500

~$242,238 annual revenue per club

Small Club (~150 members)
- ~$30K annual revenue per club

Medium-Large clubs drive revenue concentration. Smaller clubs expand network density and geographic coverage. The model works at both ends of the market. *Illustrative model, not a forecast.

Revenue Scaling

Fewer than 200 clubs to $10M+ annual revenue:
- 25 clubs → ~$1.3M
- 50 clubs → ~$2.7M
- 100 clubs → ~$5.3M
- ~190 clubs → $10M+

There are 10,000+ private fishing clubs in the U.S. alone; 190 represents less than 2% penetration. Revenue concentrates in dues processing — one large club outweighs 24 small clubs, making enterprise sales disproportionately valuable.

Why It Scales

Each new club adds:
- More properties (supply)
- More members (demand)
- More cross-club booking volume
- More data and network value

The platform compounds through trusted access density.

Capital Raise

Raising $1M Seed Round

This capital gets us to 10 clubs onboarded, the cross-club network live, and on a clear path to revenue-positive within 12 months.

Use of funds:
- Club acquisition and onboarding (40%)
- Product development (20%)
- Landowner expansion (15%)
- Marketing and launch (10%)
- Founder salary — lean, execution-focused (10%)
- Operations and infrastructure (5%)

Investment Thesis

AnglerPass is building the infrastructure layer for a fragmented, high-value niche inside outdoor recreation, with a clear path to $10M+ revenue with fewer than 200 clubs (out of 10,000+). Positioned to become the national operating system for private fly-fishing access.
